Member of: **nasscom**

# Indian Cyber Security Solutions

in association with

## Indian Institute of Cyber Security

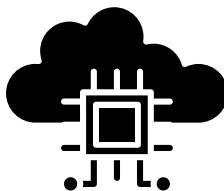

Step into the future of technology with our Advance Cloud Computing Professional Course, offered jointly by Indian Cyber Security Solutions and the Indian Institute of Cyber Security. This program provides comprehensive, hands-on training in cloud architecture, virtualization, cloud security, and multi-cloud deployments across leading platforms like AWS, Azure, and Google Cloud.

Learn how modern organizations build, automate, and secure their cloud environments while gaining real-world skills under the mentorship of industry specialists.

Advance your career in cloud engineering, security, and DevOps today!

# About the Program

Cloud Architecture

Cloud Security

DevOps &amp; Automation

In this advanced training program, we take you deep into the world of cloud technologies to equip you with the practical skills and expertise required to excel in today's cloud-driven IT environment. The program focuses on hands-on learning in **Cloud Architecture**, **Cloud Security**, and **DevOps & Automation** across major cloud platforms.

You'll explore real-world cloud deployment models, virtualization concepts, identity & access management, containerization, CI/CD pipelines, and multi-cloud strategies used by top organizations worldwide. Through practical labs and scenario-based challenges, you'll learn how to design scalable infrastructures, secure cloud environments, optimize resources, and manage enterprise-level cloud operations.

Whether you're an aspiring cloud engineer or an IT professional looking to upskill, this program opens the door to a high-demand, future-ready career in cloud computing.

# Certification

After the completion of the course, candidates will get a joint certificate from Indian Cyber Security Solutions and Indian Institute of Cyber Security

# Course Fee

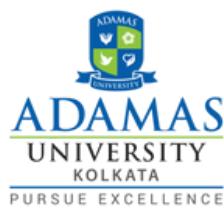

Class Room Training	Online LIVE Training
<p><b>Course Fee: INR 20,000/</b> (One-time payment)</p> <p><b>Course Duration: 60Hours</b> <b>3 Months Training</b></p> <p>2 Classes Per Week X 2 Hours Each Day</p> <p><b>Batch Timing</b></p> <p>Week End Classes   Week Days Classes</p>	<p><b>Course Fee: INR 20,000/</b> (One-time payment)</p> <p><b>Course Duration: 60Hours</b> <b>3 Months Training</b></p> <p>2 Classes Per Week X 2 Hours Each Day</p> <p><b>Batch Timing</b></p> <p>Week End Classes   Week Days Classes</p>

## Course Module

# Key Highlights

# Why Choose

## Diploma in Advanced Cloud & Network Security at ICSS

### Expert Instructors

Learn from certified cloud experts with real industry experience in AWS, Azure, and Google Cloud.

### Practical and Hands-on Training

Build real cloud skills through live labs, simulations, and projects in deployment, automation, and security.

### Flexible Learning Options

Choose online or classroom training designed to fit both students and working professionals.

### Global Recognition & Networking Opportunities

Gain certification-ready skills that open doors to careers in cloud engineering, DevOps, and cloud security.

# Eligibility Critaria

---

## Technical

**Individuals with a Technical foundation can expand their expertise by enrolling in Advance Cloud Computing Course**

- Familiarity with computer systems, software and programming concepts is helpful.
- No formal experience required, but some exposure to coding or IT concepts is beneficial.
- Comfort with technology, logical thinking, and problem-solving abilities are advantageous.
- Willingness to learn and explore technical topics is important.
- Individuals interested in cloud computing and Azure services are encouraged to join.

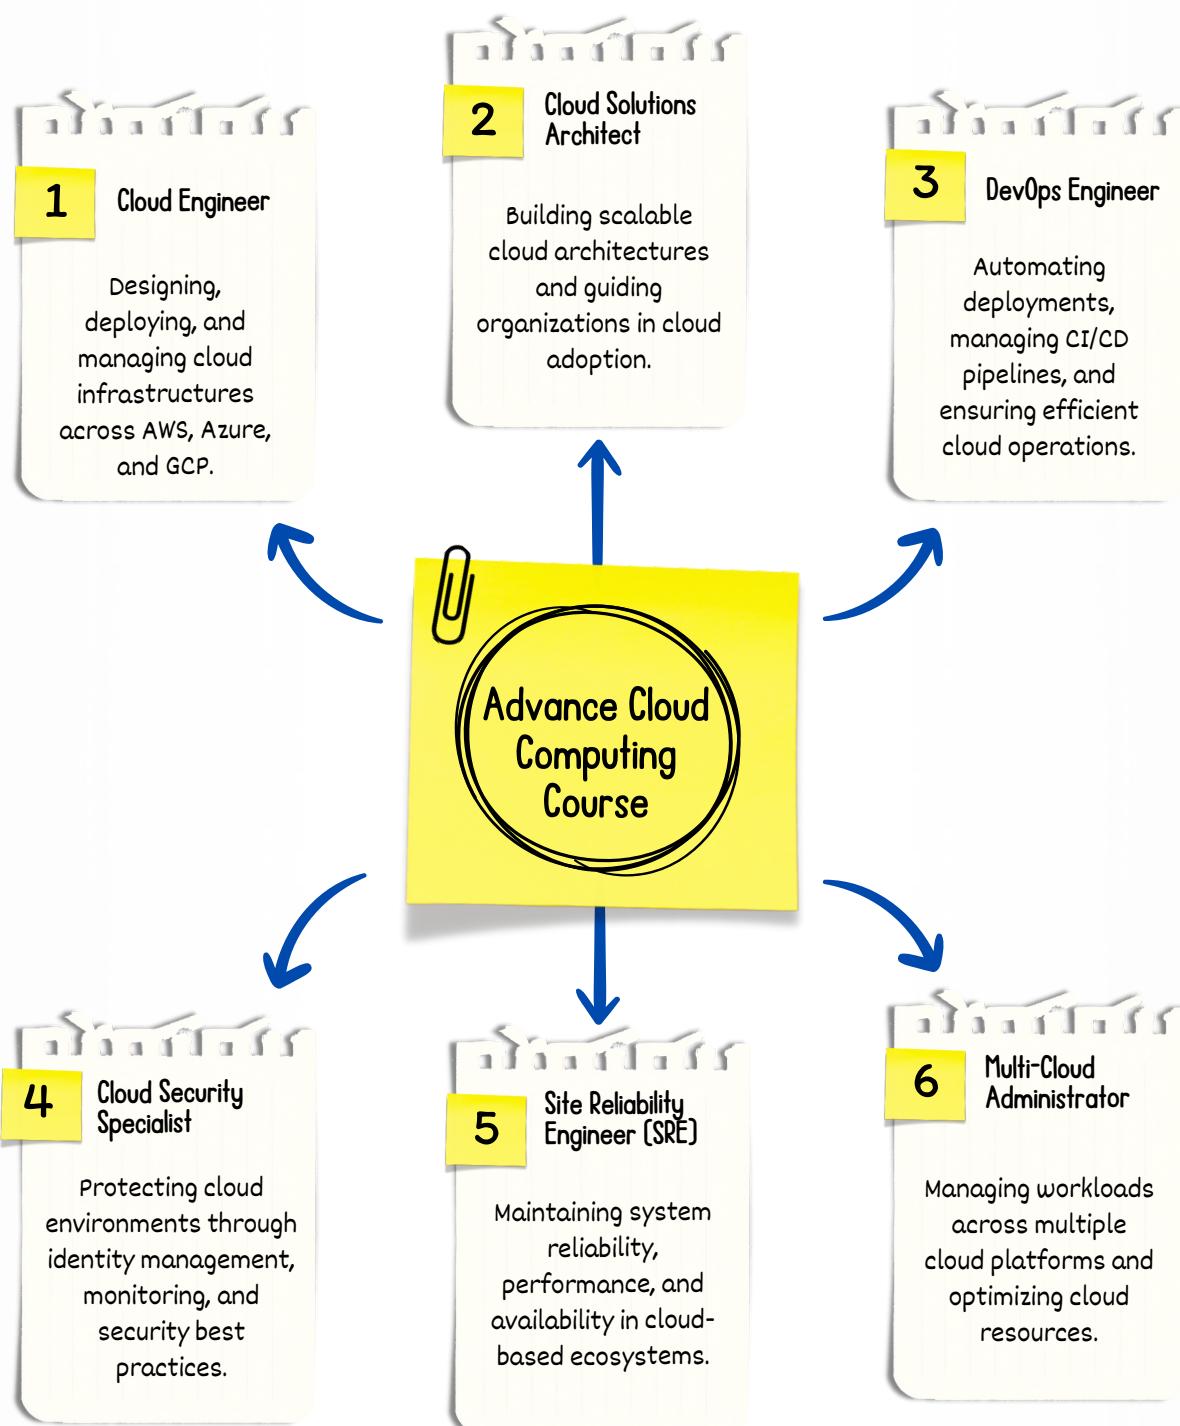

## Non-Technical

**Students from non-technical disciplines can pursue courses in Advance Cloud Computing Course**

- A keen curiosity about technology and the cloud is all you need to start.
- No coding or technical skills are necessary to begin the training.
- Comfortable using a computer and basic software applications.
- An open mind and a desire to understand new concepts.
- Good communication skills to collaborate effectively with tech experts.

# Job Opportunities

# Trainers Profile

- Cloud Computing & DevOps Experts:**

Trainers with deep experience in AWS, Azure, Google Cloud, automation tools, containerization, and enterprise cloud solutions.

- Hands-On Teaching Approach:**

Live practical labs on cloud deployment, IAM, networking, Docker, Kubernetes, CI/CD pipelines, and real-world cloud use cases.

- Years of Industry Experience:**

Professionals with strong backgrounds in cloud engineering, DevOps, cloud security, SRE operations, and large-scale infrastructure.

- Corporate Training Expertise:**

Experience delivering cloud and DevOps training to organizations, aligned with industry standards and modern multi-cloud environments.

- Personalized Learning Support:**

One-on-one guidance, feedback, and continuous support to ensure every student masters hands-on cloud skills.

- Career Guidance & Mentorship:**

Support with resumes, interviews, cloud certification paths, and career direction in cloud engineering, DevOps, and cloud security roles.

**HSD Responsible Disclosure: Rabsun Sarkar Reported a Vulnerability in the Security Talent Website**

20 Jun 2018 | Author: HSD Foundation

HSD has a Responsible Disclosure Policy for its IT systems. Recently, Rabsun Sarkar (Certified Ethical Hacker from India) reported a vulnerability in the Security Talent website, showing the importance of having such a policy. It concerns Host Header Injection, which could cause the web application to behave in unexpected ways.

Our website developer Maalika Media quickly took action and solved the issue. We are very grateful for their expertise and

**Rabsun Sarkar** one of our students has found zero-day vulnerabilities in Google and in the Security Talent Website and also reported the same:

# Other Collaborators

Parul University: Indian Cyber Security Solutions (ICSS) is delighted to join forces with Parul University in April 2022, marking the start of a five-year strategic collaboration focused on pushing the boundaries of cybersecurity education and research. ICSS will be investing its expertise and resources into this venture, equipping students with unrivaled skills for success in their field – ultimately igniting positive change across the industry through our steadfast commitment. We are brimming with anticipation over what incredible results will come from this partnership!

MAKAUT (ISKFGI College): With the ever-growing demand for skilled cybersecurity professionals. ICSS has teamed up with SKFGI College in a long-term partnership to establish an industry-leading program. For 10 years we will use our wealth of expertise and resources to ensure that students receive cutting-edge knowledge and skills from this collaboration- creating future leaders who can tackle any cybersecurity challenge. Our ambition is clear- develop tomorrow's talent today by empowering young minds into becoming successful digital citizens!

LOVELY  
PROFESSIONAL  
UNIVERSITY

Lovely Professional University: Indian Cyber Security Solutions has collaborated with LPU to organize cyber security workshops, Hackathons and Bootcamps. The students at LPU put their skills to the test, making for a truly inspiring event. LPU and ICSS have decided to organize more such events as these events help them to sharpen the skills.
