CERTIFICATION TRAINING

Member of: **nasscom**

Indian Cyber Security Solutions

in association with

Indian Institute of Cyber Security

Step into the world of advanced cybersecurity with our CompTIA PenTest+ Certification Training, brought to you by Indian Cyber Security Solutions in association with the Indian Institute of Cyber Security. Gain hands-on expertise in penetration testing, vulnerability assessment, and ethical hacking through real-world attack simulations and practical labs. Learn from experienced cybersecurity professionals and prepare for a globally recognized certification that validates your offensive security skills. Identify, exploit, report, and manage security vulnerabilities—start your PenTest+ journey today and stand out in the cybersecurity domain!

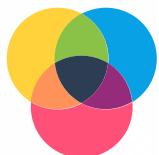

About the Program

Pentesting

Network Security

The CompTIA PenTest+ Training Certification in India by Indian Cyber Security Solutions, in collaboration with the Indian Institute of Cyber Security, is designed to build a strong foundation in cybersecurity. This program equips learners with practical knowledge in threat management, risk assessment, network security, cryptography, and compliance. Through real-world labs and expert-led sessions, students gain hands-on experience and industry-relevant skills to confidently handle security challenges. Whether you're beginning your cybersecurity journey or aiming to earn a globally recognized certification, this course prepares you for a successful career in information security.

Certification

After the completion of the course, candidates will get a joint certificate from Indian Cyber Security Solutions and Indian Institute of Cyber Security

Key Highlights

Why Choose Comptia PenTest+ Training at ICSS

Experienced and Renowned Instructors

ICSS is home to a group of knowledgeable and well-respected lecturers that bring their real-world expertise and insider understanding of the business to the classroom.

Practical and hands-on Training

Our program understands the value of flexibility and convenience, offering both online and in-person options. We prioritize accommodating your busy lifestyle.

The program is affordable and flexible

Our program understands the value of flexibility and convenience, offering both online and in-person options. We prioritize accommodating your busy lifestyle.

Global Recognition & Networking Opportunities

Our program understands the value of flexibility and convenience, offering both online and in-person options. We prioritize accommodating your busy lifestyle.

Eligibility Critaria

Technical

Individuals with a Technical foundation can expand their expertise by enrolling in Comptia PenTest+ course.

- Graduates in science (B.Tech in CSE/IT/EC or BCA) can enroll.
- Commence with Certified Python Programmer course.
- Option to pursue Ethical Hacking course or C|EH certification.

Non-Technical

Students from non-technical disciplines can also pursue Comptia PenTest+ course.

- Arts, commerce, or non-science graduates eligible.
- Begin with Certified Network Professional course.
- Conclude with Certified Network Penetration Tester course.

Job Opportunities

Trainers Profile

- At Indian Cyber Security Solutions (ICSS), our CompTIA Security+ trainers are seasoned cybersecurity professionals with a strong blend of theoretical knowledge and real-world expertise. Each trainer holds industry-recognized certifications and brings hands-on experience in key areas such as network security, risk management, cryptography, and threat mitigation.
- Our team consists of Cyber security analysts actively working in the field, ensuring that students receive training aligned with current industry standards and security practices. With practical labs and real-world use cases, ICSS trainers deliver engaging sessions that help learners confidently understand and apply complex security concepts.
- The training approach focuses on interactive, lab-based learning, personalized guidance, and career-oriented mentorship. From strengthening technical skills to building impactful resumes and preparing for job roles like Cyber Security Analyst—our trainers support students every step of the way toward certification and career success.
- Trainers conduct exam simulations to boost confidence and readiness.
- Real-time threat scenarios and case studies are integrated into sessions for hands-on learning.
- Students gain exclusive access to recorded sessions and updated study materials for continuous learning.

HSD Responsible Disclosure: Rabsun Sarkar Reported a Vulnerability in the Security Talent Website

20 Jun 2018 | Author: HSD Foundation

HSD has a Responsible Disclosure Policy for its IT systems. Recently, Rabsun Sarkar (Certified Ethical Hacker from India) reported a vulnerability in the Security Talent website, showing the importance of having such a policy. It concerns Host Header Injection, which could cause the web application to behave in unexpected ways.

Our website developer Maalika Media quickly took action and solved the issue. We are very grateful for their expertise and

Rabsun Sarkar one of our students has found zero-day vulnerabilities in Google and in the Security Talent Website and also reported the same:

Other Collaborators

Parul University: Indian Cyber Security Solutions (ICSS) is delighted to join forces with Parul University in April 2022, marking the start of a five-year strategic collaboration focused on pushing the boundaries of cybersecurity education and research. ICSS will be investing its expertise and resources into this venture, equipping students with unrivaled skills for success in their field – ultimately igniting positive change across the industry through our steadfast commitment. We are brimming with anticipation over what incredible results will come from this partnership!

MAKAUT (ISKFGI College): With the ever-growing demand for skilled cybersecurity professionals. ICSS has teamed up with SKFGI College in a long-term partnership to establish an industry-leading program. For 10 years we will use our wealth of expertise and resources to ensure that students receive cutting-edge knowledge and skills from this collaboration- creating future leaders who can tackle any cybersecurity challenge. Our ambition is clear- develop tomorrow's talent today by empowering young minds into becoming successful digital citizens!

LOVELY
PROFESSIONAL
UNIVERSITY

Lovely Professional University: Indian Cyber Security Solutions has collaborated with LPU to organize cyber security workshops, Hackathons and Bootcamps. The students at LPU put their skills to the test, making for a truly inspiring event. LPU and ICSS have decided to organize more such events as these events help them to sharpen the skills.
