DIPLOMA IN  
ADVANCED CLOUD &  
NETWORK SECURITY

Member of: **nasscom**

# Indian Cyber Security Solutions

in association with

## Indian Institute of Cyber Security

Step into the future of cyber defense with our Diploma in Advanced Cloud & Network Security, a specialized program crafted by Indian Cyber Security Solutions and the Indian Institute of Cyber Security. Gain hands-on expertise in securing cloud platforms (AWS, Azure, GCP) and protecting enterprise networks through advanced routing, switching, firewalls, IAM, automation, and real-world security practices. Build industry-ready skills in cloud architecture, network defense, and modern security tools—preparing you for high-demand roles in today's cybersecurity ecosystem.

Start your journey toward becoming a certified Cloud & Network Security professional today!

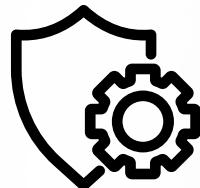

# About the Program

Cloud Security

Network Security

Security Automation

In this advanced training program, we dive deep into the world of cloud and network security to equip you with the practical skills and expertise required to secure modern digital infrastructures. The curriculum focuses on hands-on learning across Cloud Security, Network Security, and Security Automation.

You'll explore real-world cloud architectures, identity and access management, secure VPC design, routing and switching, firewall configuration, and monitoring tools used by cybersecurity professionals. Through practical labs and simulation-based challenges, you'll learn how to secure AWS, Azure, and hybrid environments, detect vulnerabilities, mitigate threats, and strengthen enterprise network defenses.

Whether you're an aspiring cybersecurity engineer or an IT professional looking to upskill, this program prepares you for high-growth roles in cloud security, network security, and SOC operations—opening the door to a rewarding and future-ready cybersecurity career.

# Certification

After the completion of the course, candidates will get a joint certificate from Indian Cyber Security Solutions and Indian Institute of Cyber Security

## INDIAN INSTITUTE OF CYBER SECURITY

In association with **Indian Cyber Security Solutions**

AN ISO 27001 & 9001:2015 Certified Company

Certificate Number: IICS3690XXXXXX

# Key Highlights

# Why Choose

## Diploma in Advanced Cloud & Network Security at ICSS

### Expert Instructors

Learn from industry experts with real-world experience in cloud architecture, network security, and enterprise security operations – bringing practical insights directly to your training.

### Practical and Hands-on Training

Master Cloud and Network Security through lab-based learning, real-time simulations, and practical projects covering AWS, Azure, routing, switching, firewalls, IDS/IPS, and automation tools.

### Flexible Learning Options

Our course is designed to fit your schedule, offering both online and in-person training options. We ensure high-quality learning at an accessible cost for students and working professionals.

### Global Recognition & Networking Opportunities

Gain industry-aligned skills and certification-ready expertise that open doors to high-demand careers in cloud security, network security, SOC operations, and infrastructure defense.

# Eligibility Criteria

---

## Technical

**Individuals with a Technical foundation can expand their expertise by enrolling in Diploma in Advanced Cloud & Network Security**

- Familiarity with computer systems, software and programming concepts is helpful.
- No formal experience required, but some exposure to coding or IT concepts is beneficial.
- Comfort with technology, logical thinking, and problem-solving abilities are advantageous.
- Willingness to learn and explore technical topics is important.
- Individuals interested in cloud computing and Azure services are encouraged to join.

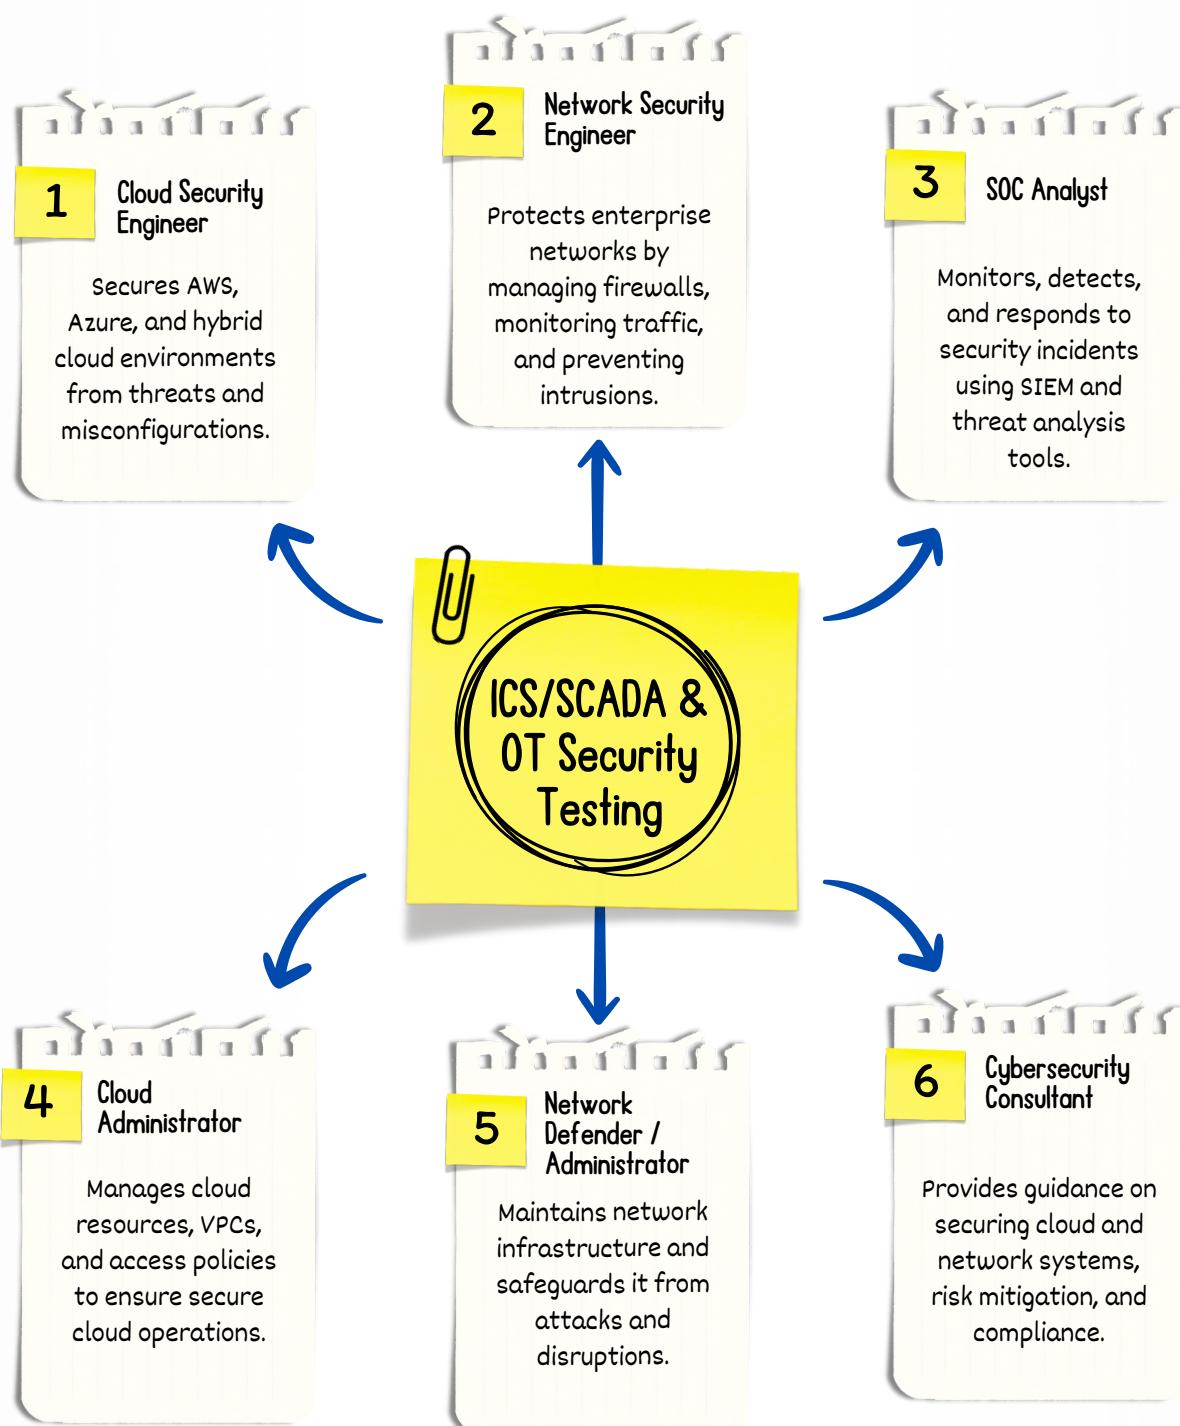

## Non-Technical

**Students from non-technical disciplines can pursue courses in Diploma in Advanced Cloud & Network Security**

- A keen curiosity about technology and the cloud is all you need to start.
- No coding or technical skills are necessary to begin the training.
- Comfortable using a computer and basic software applications.
- An open mind and a desire to understand new concepts.
- Good communication skills to collaborate effectively with tech experts.

# Job Opportunities

# Trainers Profile

- Cloud & Network Security Experts:**

Trainers with deep experience in cloud platforms, network defense, enterprise security, and large-scale infrastructure.

- Hands-On Teaching Approach:**

Live practical labs covering AWS, Azure, routing, switching, firewalls, SIEM tools, and real-world security scenarios.

- Years of Industry Experience:**

Professionals with strong backgrounds in cybersecurity, cloud engineering, SOC operations, and network architecture.

- Corporate Training Expertise:**

Experience delivering security training to organizations, aligned with industry standards and modern cloud-network environments.

- Personalized Learning Support:**

One-on-one guidance, feedback, and continuous support to ensure every student masters practical skills.

- Career Guidance & Mentorship:**

Support with resumes, interviews, certification paths, and career direction in cloud and network security roles.

**HSD Responsible Disclosure: Rabsun Sarkar Reported a Vulnerability in the Security Talent Website**

20 Jun 2018 | Author: HSD Foundation

HSD has a Responsible Disclosure Policy for its IT systems. Recently, Rabsun Sarkar (Certified Ethical Hacker from India) reported a vulnerability in the Security Talent website, showing the importance of having such a policy. It concerns Host Header injection, which could cause the web application to behave in unexpected ways.

Our website developer Maalika Media quickly took action and solved the issue. We are very grateful for their expertise and

**Rabsun Sarkar** one of our students has found zero-day vulnerabilities in Google and in the Security Talent Website and also reported the same:

# Other Collaborators

Parul University: Indian Cyber Security Solutions (ICSS) is delighted to join forces with Parul University in April 2022, marking the start of a five-year strategic collaboration focused on pushing the boundaries of cybersecurity education and research. ICSS will be investing its expertise and resources into this venture, equipping students with unrivaled skills for success in their field – ultimately igniting positive change across the industry through our steadfast commitment. We are brimming with anticipation over what incredible results will come from this partnership!

MAKAUT (ISKFGI College): With the ever-growing demand for skilled cybersecurity professionals. ICSS has teamed up with SKFGI College in a long-term partnership to establish an industry-leading program. For 10 years we will use our wealth of expertise and resources to ensure that students receive cutting-edge knowledge and skills from this collaboration- creating future leaders who can tackle any cybersecurity challenge. Our ambition is clear- develop tomorrow's talent today by empowering young minds into becoming successful digital citizens!

LOVELY  
PROFESSIONAL  
UNIVERSITY

Lovely Professional University: Indian Cyber Security Solutions has collaborated with LPU to organize cyber security workshops, Hackathons and Bootcamps. The students at LPU put their skills to the test, making for a truly inspiring event. LPU and ICSS have decided to organize more such events as these events help them to sharpen the skills.
