DIPLOMA IN CLOUD INFRASTRUCTURE MANAGEMENT

Member of: **nasscom**

Indian Chamber of Commerce

Indian Cyber Security Solutions

in association with

Indian Institute of Cyber Security

Step into the future of IT operations with our Diploma in Cloud Infrastructure Management, offered by Indian Cyber Security Solutions in association with the Indian Institute of Cyber Security.

Gain hands-on expertise in managing cloud and hybrid infrastructure using platforms like AWS, Azure, Linux, and virtualization technologies.

Learn to deploy, monitor, and optimize scalable cloud infrastructure, covering networking, storage, virtualization, and automation.

Build job-ready skills for high-demand cloud and infrastructure roles in today's digital ecosystem.

About the Program

The Diploma in Cloud Infrastructure Management is designed to build strong practical expertise in managing modern cloud and hybrid IT environments. This program focuses on developing the skills required to operate, maintain, and optimize enterprise infrastructure.

The curriculum covers **Linux administration, cloud platforms (AWS & Azure), virtualization, networking, storage, and infrastructure monitoring**, ensuring a solid foundation in cloud operations.

Through hands-on labs and real-world scenarios, learners gain experience in deploying cloud resources, managing virtual machines, implementing backup and disaster recovery, and automating infrastructure tasks.

This program prepares learners for in-demand roles in cloud administration, infrastructure management, and DevOps support, enabling a stable and future-ready IT career.

Certification

After the completion of the course, candidates will get a joint certificate from Indian Cyber Security Solutions and Indian Institute of Cyber Security

Course Fee

Class Room Training	Online LIVE Training
<p>Course Fee: INR 60,500/ (One-time payment) Course Duration: 12 Months Training 2 Classes Per Week X 2 Hours Each Day Batch Timing Week End Classes Week Days Classes</p>	<p>Course Fee: INR 60,500/ (One-time payment) Course Duration: 12 Months Training 2 Classes Per Week X 2 Hours Each Day Batch Timing Week End Classes Week Days Classes</p>

Key Highlights

Why Choose

Advance Cloud Computing Course- Overview

Expert Instructors

Learn from skilled professionals with real-world expertise in cloud infrastructure, Linux systems, virtualization, and enterprise IT operations.

Practical and Hands-on Training

Gain practical exposure through interactive labs, real-time use cases, & project-based learning covering Linux administration, cloud platforms, networking, storage, automation, & monitoring tools.

Flexible Learning Options

Choose from online or classroom training options, designed to fit the schedules of students and working professionals.

Global Recognition & Networking Opportunities

Develop industry-ready skills aligned with current IT demands, enabling careers as Cloud Administrator, Infrastructure Engineer, Linux Administrator, and DevOps Support Engineer.

Eligibility Criteria

Technical

Individuals with a technical foundation can enhance their expertise by enrolling in the Diploma in Cloud Infrastructure Management.

- Familiarity with computer systems, operating systems, networking, or IT concepts is helpful
- No prior cloud experience is required, but basic IT knowledge is an advantage
- Comfort with technical tools, logical thinking, and problem-solving skills
- Willingness to learn and explore cloud and infrastructure technologies
- Individuals interested in Linux, cloud platforms, and infrastructure management are encouraged to apply

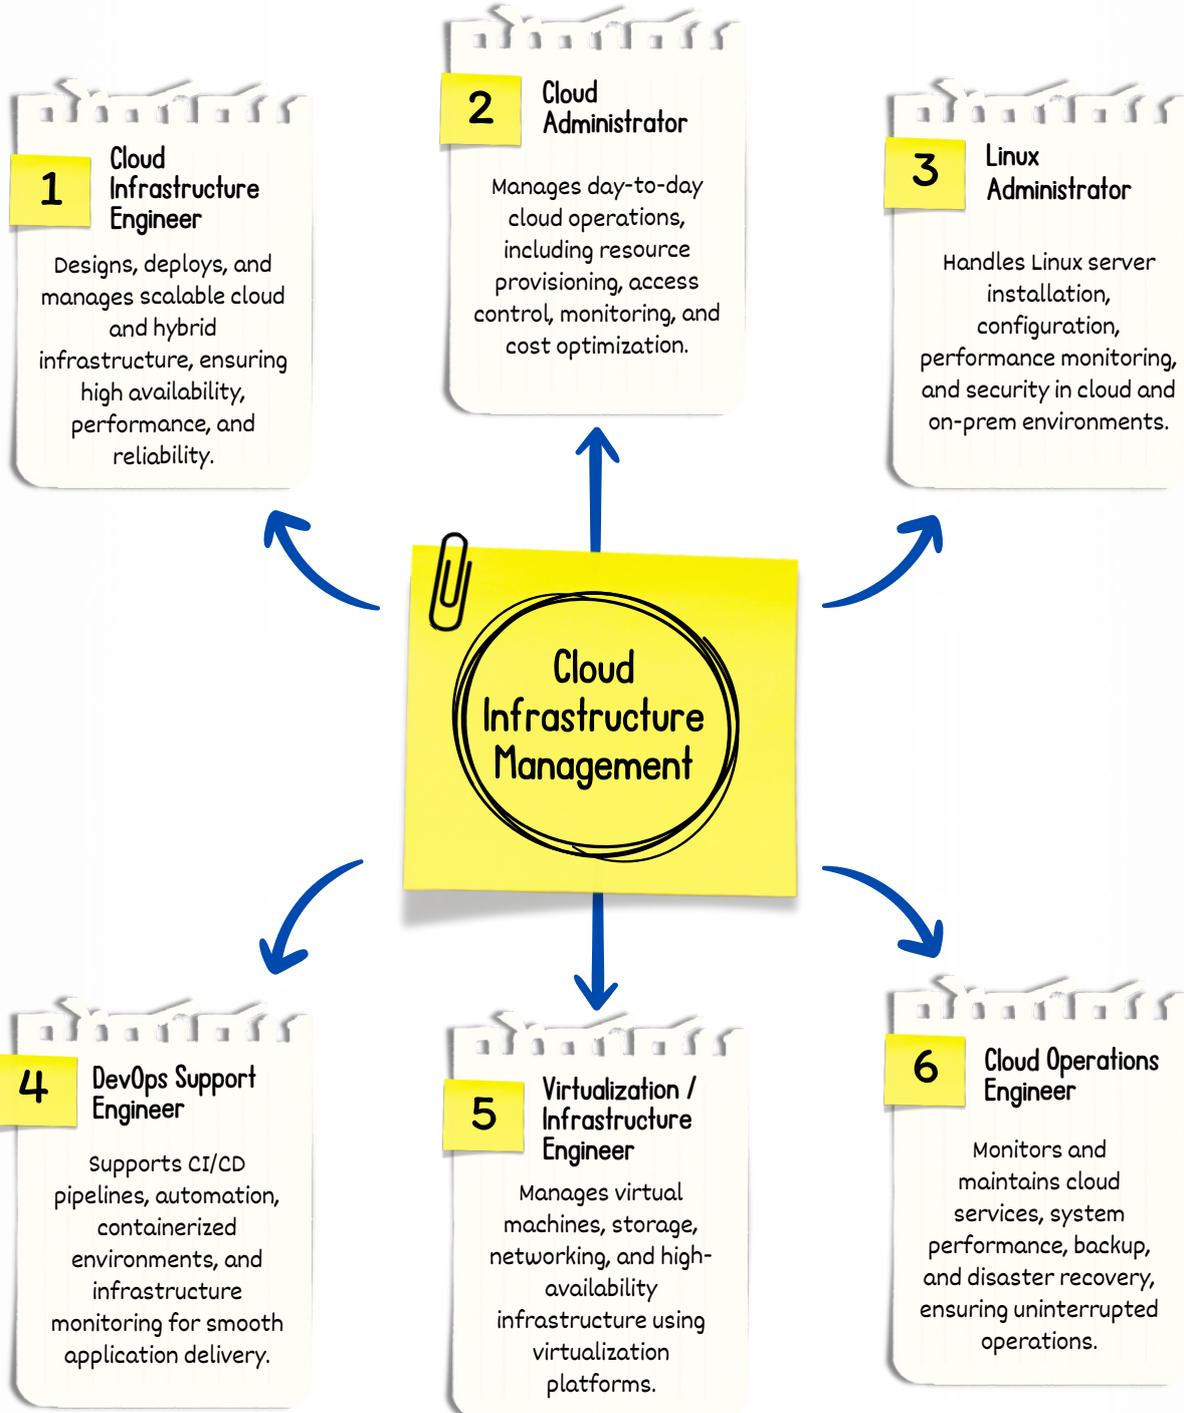

Non-Technical

Students from non-technical backgrounds can also pursue the Diploma in Cloud Infrastructure Management.

- A keen curiosity to understand cloud infrastructure and IT operations
- No prior coding or cloud knowledge required
- Basic computer usage and familiarity with software applications
- An open mindset and strong interest in cloud technologies
- Good communication skills to collaborate effectively in IT teams

Job Opportunities

Trainers Profile

- **Cloud Computing & DevOps Experts:**

Trainers with deep experience in AWS, Azure, Google Cloud, automation tools, containerization, and enterprise cloud solutions.

- **Hands-On Teaching Approach:**

Live practical labs on cloud deployment, IAM, networking, Docker, Kubernetes, CI/CD pipelines, and real-world cloud use cases.

- **Years of Industry Experience:**

Professionals with strong backgrounds in cloud engineering, DevOps, cloud security, SRE operations, and large-scale infrastructure.

- **Corporate Training Expertise:**

Experience delivering cloud and DevOps training to organizations, aligned with industry standards and modern multi-cloud environments.

- **Personalized Learning Support:**

One-on-one guidance, feedback, and continuous support to ensure every student masters hands-on cloud skills.

- **Career Guidance & Mentorship:**

Support with resumes, interviews, cloud certification paths, and career direction in cloud engineering, DevOps, and cloud security roles.

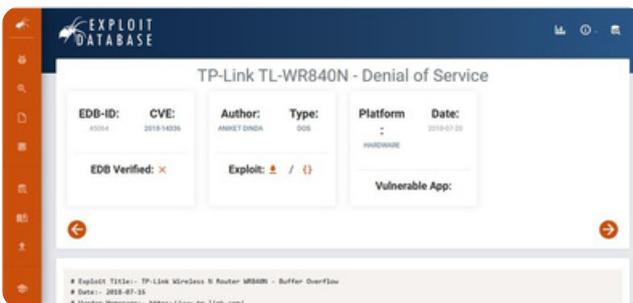

Student Achievements

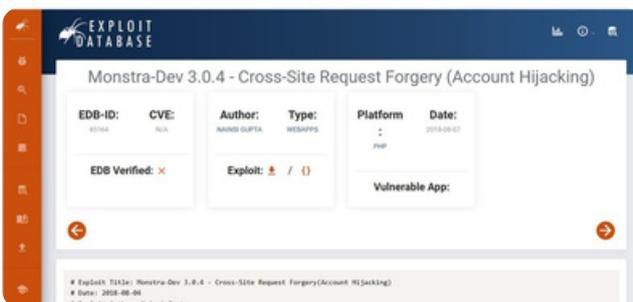

Rabsun Sarkar one of our students has found zero-day vulnerabilities in Google and in the Security Talent Website and also reported the same:

<https://securitydelta.nl/news/overview/hsd-responsible-disclosure-rabsun-sarkar-reported-a-vulnerability-in-the-security-talent-website>

Aniket Dinda is our student who has found out about Zero-Day Vulnerability and has been published on Exploit DB:

ICSS and IICS conducted a session at ICFAI University on Cyber Security and Legal Frameworks.

Our Hiring Partners

Other Collaborators

Parul University: Indian Cyber Security Solutions (ICSS) is delighted to join forces with Parul University in April 2022, marking the start of a five-year strategic collaboration focused on pushing the boundaries of cybersecurity education and research. ICSS will be investing its expertise and resources into this venture, equipping students with unrivaled skills for success in their field - ultimately igniting positive change across the industry through our steadfast commitment. We are brimming with anticipation over what incredible results will come from this partnership!

MAKAUT (ISKFGI College): With the ever-growing demand for skilled cybersecurity professionals. ICSS has teamed up with SKFGI College in a long-term partnership to establish an industry-leading program. For 10 years we will use our wealth of expertise and resources to ensure that students receive cutting-edge knowledge and skills from this collaboration- creating future leaders who can tackle any cybersecurity challenge. Our ambition is clear-develop tomorrow's talent today by empowering young minds into becoming successful digital citizens!

LOVELY
PROFESSIONAL
UNIVERSITY

Lovely Professional University: Indian Cyber Security Solutions has collaborated with LPU to organize cyber security workshops, Hackathons and Bootcamps. The students at LPU put their skills to the test, making for a truly inspiring event. LPU and ICSS have decided to organize more such events as these events help them to sharpen the skills.
