D|NS | DIPLOMA IN NETWORK SECURITY

Member of: **nasscom**

Indian Chamber of Commerce

Indian Cyber Security Solutions

in association with

Indian Institute of Cyber Security

Step into the future of cyber defense with our Diploma in Network Security, a specialized program by Indian Cyber Security Solutions and the Indian Institute of Cyber Security.

Gain hands-on expertise in securing enterprise networks, covering routing & switching, firewalls, VPNs, IDS/IPS, access control, and network monitoring.

Learn to defend organizational infrastructure using real-world security tools, secure network design, and threat detection techniques.

Build industry-ready skills for high-demand roles as a Network Security professional in today's cybersecurity ecosystem.

About the Program

In this advanced Diploma in Network Security, we dive deep into the fundamentals and advanced concepts of securing modern enterprise networks. The program is designed to equip learners with practical skills and real-world expertise required to protect digital infrastructure.

The curriculum focuses on network security architecture, routing and switching security, firewalls, VPNs, IDS/IPS, access control, and network monitoring. Learners gain hands-on experience configuring and managing enterprise-grade network security devices and tools.

Through practical labs and scenario-based training, you will learn how to identify vulnerabilities, detect network-based attacks, implement defense mechanisms, and strengthen network resilience.

This program prepares aspiring professionals for high-demand roles in Network Security, SOC operations, and infrastructure defense, opening doors to a stable and future-ready cybersecurity career.

Certification

After the completion of the course, candidates will get a joint certificate from Indian Cyber Security Solutions and Indian Institute of Cyber Security

Course Fee

Class Room Training	Online LIVE Training

Key Highlights

Why Choose

Diploma in Network Security at ICSS

Expert Instructors

Learn from experienced network security professionals with real-world exposure to enterprise networks, firewalls, intrusion detection, and security operations.

Practical and Hands-on Training

Build strong network defense skills through lab-based learning, real-time simulations, and hands-on projects covering routing & switching security, firewalls, VPNs, IDS/IPS, and network monitoring.

Flexible Learning Options

The program is designed to fit your schedule with online and in-person training options, making it ideal for students and working professionals seeking career growth in network security.

Global Recognition & Networking Opportunities

Gain job-ready skills aligned with industry requirements, opening doors to Network Security Engineer, SOC Analyst, NOC Analyst, and Infrastructure Security roles.

Eligibility Criteria

Technical

Individuals with a technical foundation can expand their expertise by enrolling in the Diploma in Network Security.

- Familiarity with computer networks, operating systems, and IT concepts is helpful
- No formal experience required, but basic networking knowledge is a plus
- Comfort with technology, logical thinking, and problem-solving skills
- Willingness to learn and explore network security concepts
- Students with interest in networking and infrastructure security are encouraged to apply

Non-Technical

Students from non-technical backgrounds can also pursue the Diploma in Network Security.

- A keen curiosity to understand network security and cyber threats
- No coding or technical skills required to begin
- Comfortable using computers and basic software applications
- An open mind and strong interest in cybersecurity
- Good communication skills to collaborate effectively with technical teams

Job Opportunities

1 **Network Security Engineer**

Designs, configures, and secures enterprise networks by managing firewalls, VPNs, IDS/IPS, and monitoring network traffic to prevent intrusions.

2 **Network Engineer**

Manages and maintains routing, switching, and network infrastructure, ensuring performance, availability, and secure connectivity.

3 **SOC Analyst**

Monitors, detects, and responds to security incidents using SIEM and threat analysis tools.

Diploma in Network security

4 **Network Administrator**

Handles day-to-day network operations, access control, and security policies to ensure secure and reliable network environments.

5 **Network Defender / Administrator**

Maintains network infrastructure and safeguards it from attacks and disruptions.

6 **Cybersecurity Analyst**

Provides security analysis, risk assessment, network hardening, and compliance support for enterprise networks.

Trainers Profile

- **Hands-on Teaching Approach:** Live practical labs covering routing & switching, firewall configuration, IDS/IPS, VPN setup, network monitoring, and incident response using real-world scenarios.
- **Years of Industry Experience:** Professionals with strong backgrounds in network security, SOC operations, infrastructure security, and network administration.
- **Corporate Training Expertise:** Proven experience delivering enterprise network security training aligned with industry standards and organizational security requirements.
- **Personalized Learning Support:** One-on-one guidance, regular feedback, and continuous support to ensure every student builds strong practical network security skills.
- **Career Guidance & Mentorship:** Support with resume building, interview preparation, certification guidance, and career direction in network security and infrastructure defense roles.

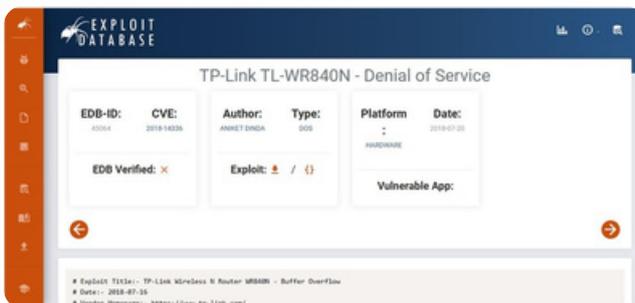

Student Achievements

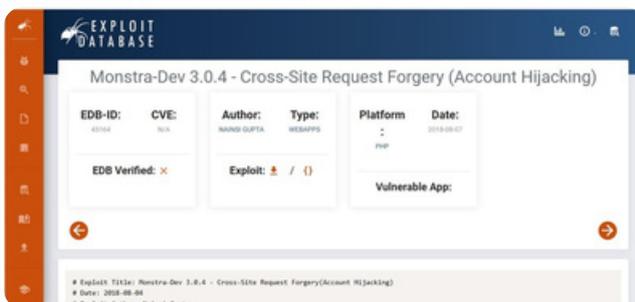

Rabsun Sarkar one of our students has found zero-day vulnerabilities in Google and in the Security Talent Website and also reported the same:

<https://securitydelta.nl/news/overview/hsd-responsible-disclosure-rabsun-sarkar-reported-a-vulnerability-in-the-security-talent-website>

Aniket Dinda is our student who has found out about Zero-Day Vulnerability and has been published on Exploit DB:

Our Hiring Partners

Other Collaborators

Parul University: Indian Cyber Security Solutions (ICSS) is delighted to join forces with Parul University in April 2022, marking the start of a five-year strategic collaboration focused on pushing the boundaries of cybersecurity education and research. ICSS will be investing its expertise and resources into this venture, equipping students with unrivaled skills for success in their field - ultimately igniting positive change across the industry through our steadfast commitment. We are brimming with anticipation over what incredible results will come from this partnership!

MAKAUT (ISKFGI College): With the ever-growing demand for skilled cybersecurity professionals. ICSS has teamed up with SKFGI College in a long-term partnership to establish an industry-leading program. For 10 years we will use our wealth of expertise and resources to ensure that students receive cutting-edge knowledge and skills from this collaboration- creating future leaders who can tackle any cybersecurity challenge. Our ambition is clear-develop tomorrow's talent today by empowering young minds into becoming successful digital citizens!

LOVELY
PROFESSIONAL
UNIVERSITY

Lovely Professional University: Indian Cyber Security Solutions has collaborated with LPU to organize cyber security workshops, Hackathons and Bootcamps. The students at LPU put their skills to the test, making for a truly inspiring event. LPU and ICSS have decided to organize more such events as these events help them to sharpen the skills.
