Indian Cyber Security Solutions

in association with

Indian Institute of Cyber Security

Kickstart your cybersecurity journey with our Diploma in Web Application Security, created by Indian Cyber Security Solutions in collaboration with the Indian Institute of Cyber Security. This program gives you practical, hands-on skills to identify vulnerabilities, perform web penetration testing, and secure modern applications against real-world threats.

Learn essential concepts like SQL injection, XSS, authentication flaws, access control issues, and API security using industry-standard tools and guidance from professionals. Build a strong foundation for roles in VAPT, SOC, and application security.

Start your path toward becoming a Web Application Security specialist today.

About the Program

Vulnerability Assessment

Web Application Security

Penetration Testing

In this specialized diploma program, we focus on the essential skills required to secure modern web applications against today's evolving cyber threats. You'll receive hands-on training in Web Application Security, Vulnerability Assessment, and Penetration Testing, gaining practical experience with industry-standard tools and real-world attack scenarios. The program covers key concepts such as authentication flaws, access control issues, injection vulnerabilities, API security, and secure coding practices. Whether you're starting your cybersecurity journey or looking to advance your expertise, this diploma equips you with the knowledge and practical capabilities needed to analyze, identify, and safeguard web applications with confidence.

Certification

After the completion of the course, candidates will get a joint certificate from Indian Cyber Security Solutions and Indian Institute of Cyber Security

Key Highlights

Why Choose D | WPS Training at ICSS

Experienced and Renowned Instructors

ICSS is home to a group of knowledgeable and well-respected lecturers that bring their real-world expertise and insider understanding of the business to the classroom.

Practical and hands-on Training

Our program understands the value of flexibility and convenience, offering both online and in-person options. We prioritize accommodating your busy lifestyle.

The program is affordable and flexible

Our program understands the value of flexibility and convenience, offering both online and in-person options. We prioritize accommodating your busy lifestyle.

Global Recognition & Networking Opportunities

Our program understands the value of flexibility and convenience, offering both online and in-person options. We prioritize accommodating your busy lifestyle.

Eligibility Criteria

Technical

Individuals with a technical background can strengthen their cybersecurity career by mastering core concepts of web security through the Diploma in Web Application Security.

- Graduates in Science or Engineering (B.Tech/B.Sc in CSE, IT, ECE, or similar fields) are eligible.
- Can begin with foundational programming skills (Python recommended).
- Option to pursue advanced certifications in Ethical Hacking or Web Application Penetration Testing.

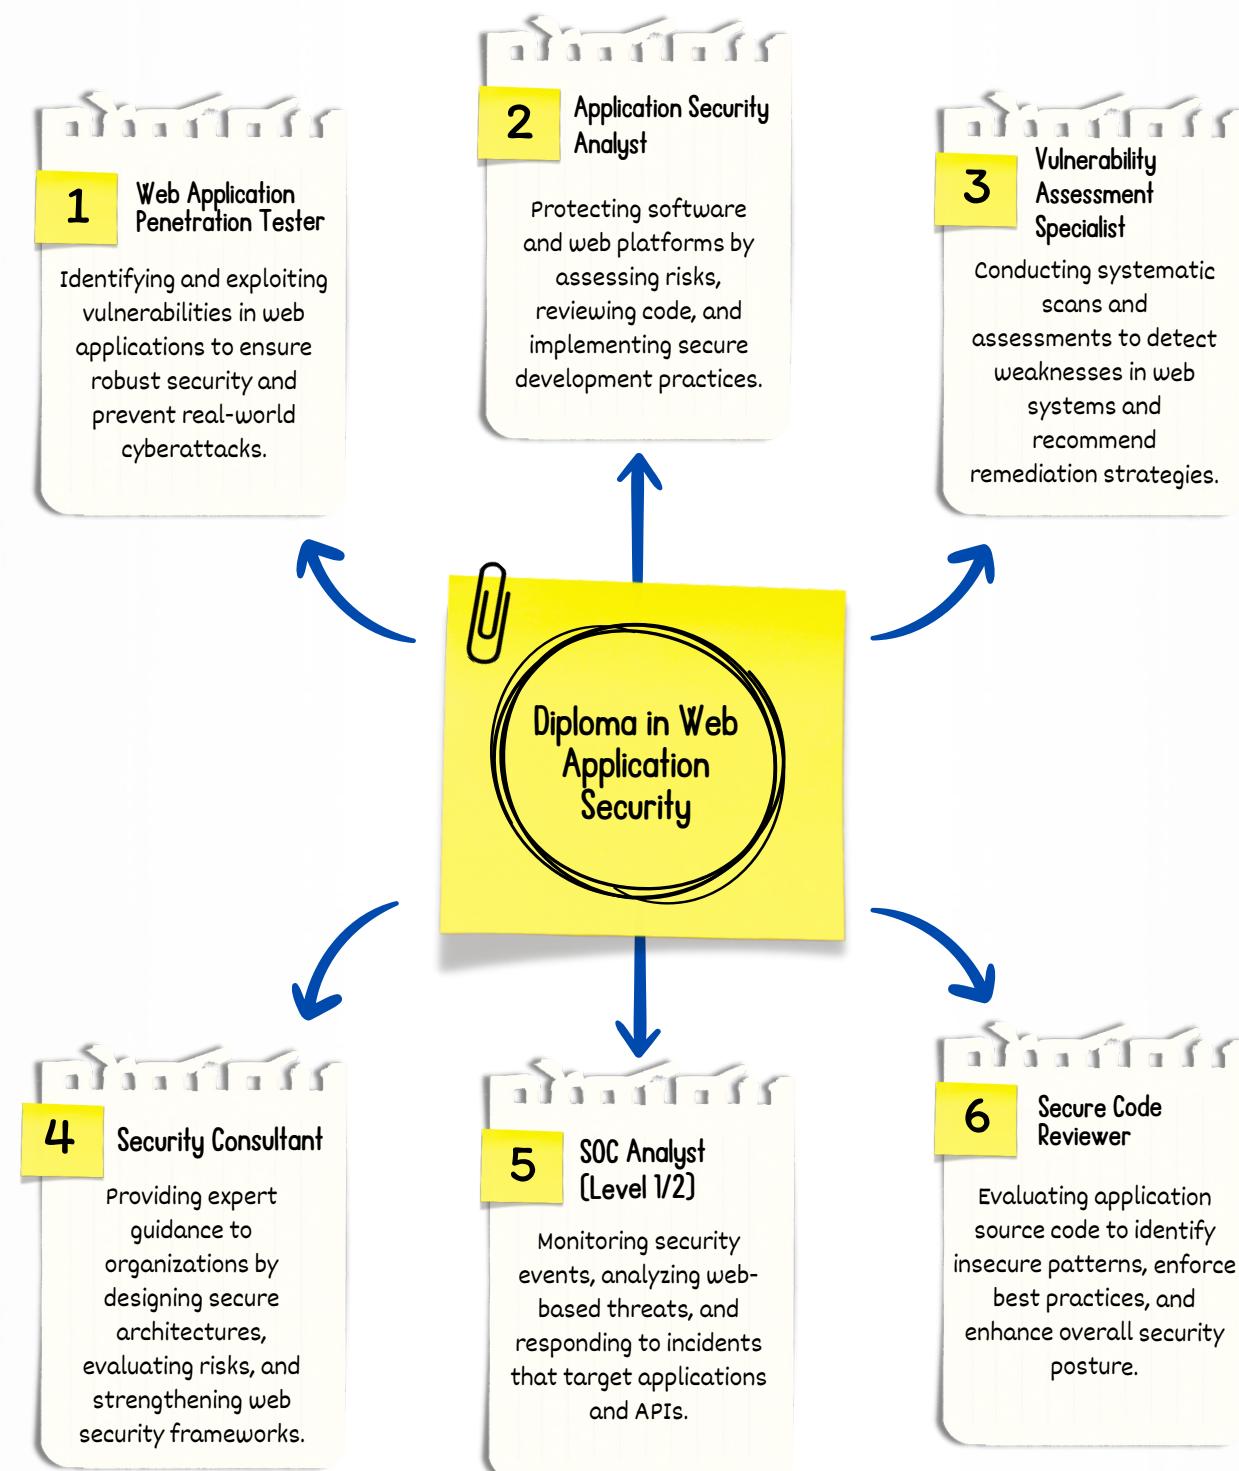

Non-Technical

Students from non-technical backgrounds can also enroll in the Diploma in Web Application Security and gradually build the skills needed to secure modern web applications.

- Arts, commerce, and other non-science graduates are eligible.
- Start with the basics of networking and cybersecurity fundamentals.
- Progress toward hands-on modules in vulnerability assessment and web penetration testing.

Job Opportunities

Trainers Profile

- At Indian Cyber Security Solutions (ICSS), our Web Application Security trainers combine strong academic backgrounds with real-world industry expertise to deliver impactful and practical cybersecurity education.
- Our trainers bring hands-on experience in core areas such as Web Application Penetration Testing, Vulnerability Assessment, Secure Coding Practices, API Security, and OWASP Top 10 methodologies.
- The team includes certified ethical hackers, penetration testers, and application security engineers with proven experience working on enterprise-level security assessments across industries like finance, healthcare, e-commerce, and cloud services.
- They stay updated with emerging vulnerabilities, modern attack vectors, and evolving security standards, ensuring students learn current, industry-relevant techniques through real-world case studies and practical sessions.
- ICSS emphasizes a hands-on learning approach—our trainers guide students through live demonstrations, lab-based exercises, capture-the-flag challenges, and real-time exploitation scenarios to build job-ready skills.
- With personalized mentorship, progress reviews, and practical projects, our trainers help learners gain confidence in identifying vulnerabilities and securing web applications effectively.
- The goal is to prepare students for successful careers in cybersecurity roles such as Web Application Penetration Tester, Application Security Analyst, VAPT Engineer, and SOC Analyst.

HSD Responsible Disclosure: Rabsun Sarkar Reported a Vulnerability in the Security Talent Website

20 Jun 2018 | Author: HSD Foundation

HSD has a Responsible Disclosure Policy for its IT systems. Recently, Rabsun Sarkar (Certified Ethical Hacker from India) reported a vulnerability in the Security Talent website, showing the importance of having such a policy. It concerns Host Header injection, which could cause the web application to behave in unexpected ways.

Our website developer Maalika Media quickly took action and solved the issue. We are very grateful for their expertise and

Rabsun Sarkar one of our students has found zero-day vulnerabilities in Google and in the Security Talent Website and also reported the same:

Other Collaborators

Parul University: Indian Cyber Security Solutions (ICSS) is delighted to join forces with Parul University in April 2022, marking the start of a five-year strategic collaboration focused on pushing the boundaries of cybersecurity education and research. ICSS will be investing its expertise and resources into this venture, equipping students with unrivaled skills for success in their field – ultimately igniting positive change across the industry through our steadfast commitment. We are brimming with anticipation over what incredible results will come from this partnership!

MAKAUT (ISKFGI College): With the ever-growing demand for skilled cybersecurity professionals. ICSS has teamed up with SKFGI College in a long-term partnership to establish an industry-leading program. For 10 years we will use our wealth of expertise and resources to ensure that students receive cutting-edge knowledge and skills from this collaboration- creating future leaders who can tackle any cybersecurity challenge. Our ambition is clear- develop tomorrow's talent today by empowering young minds into becoming successful digital citizens!

**LOVELY
PROFESSIONAL
UNIVERSITY**

Lovely Professional University: Indian Cyber Security Solutions has collaborated with LPU to organize cyber security workshops, Hackathons and Bootcamps. The students at LPU put their skills to the test, making for a truly inspiring event. LPU and ICSS have decided to organize more such events as these events help them to sharpen the skills.
