Indian Cyber Security Solutions

in association with

Indian Institute of Cyber Security

Commence a transformative voyage as an Offensive Security Certified Professional (OSCP) with Indian Cyber Security Solutions. Engage in a hands-on program at the Indian Institute of Cyber Security, acquiring advanced penetration testing skills under seasoned professionals. Attain the prestigious OSCP certification, propelling your career in offensive security. Secure a successful future in ethical hacking and penetration testing!

About the Program

Unveil the realm of cybersecurity proficiency through our Offensive Security Certified Professional (OSCP) training. Integrating theoretical foundations with hands-on application, this comprehensive program explores core offensive security principles in Level One, paving the way for participants to navigate advanced techniques and real-world challenges in Level Two. Guided by industry experts from Indian Cyber Security Solutions and the Indian Institute of Cyber Security, our program empowers individuals with crucial knowledge and skills for a flourishing career in the dynamic field of offensive security. Elevate your cybersecurity expertise and embrace the opportunities of the digital age with OSCP.

Certification

After the completion of the course, candidates will get a joint certificate from Indian Cyber Security Solutions and Indian Institute of Cyber Security

Key Highlights

Why Choose OSCP Training at ICSS

Experienced and Renowned Instructors

ICSS is home to a group of knowledgeable and well-respected lecturers that bring their real-world expertise and insider understanding of the business to the classroom.

Practical and hands-on Training

Our program understands the value of flexibility and convenience, offering both online and in-person options. We prioritize accommodating your busy lifestyle.

The program is affordable and flexible

Our program understands the value of flexibility and convenience, offering both online and in-person options. We prioritize accommodating your busy lifestyle.

Global Recognition & Networking Opportunities

Our program understands the value of flexibility and convenience, offering both online and in-person options. We prioritize accommodating your busy lifestyle.

Eligibility Criteria

Technical

Individuals with a Technical foundation can expand their expertise by enrolling in OSCP course.

- Science graduates (B.Tech in CSE/IT/EC or BCA) eligible.
- Begin with Certified Python Programmer course.
- Follow with Ethical Hacking course and Certified Web Application Penetration testing.

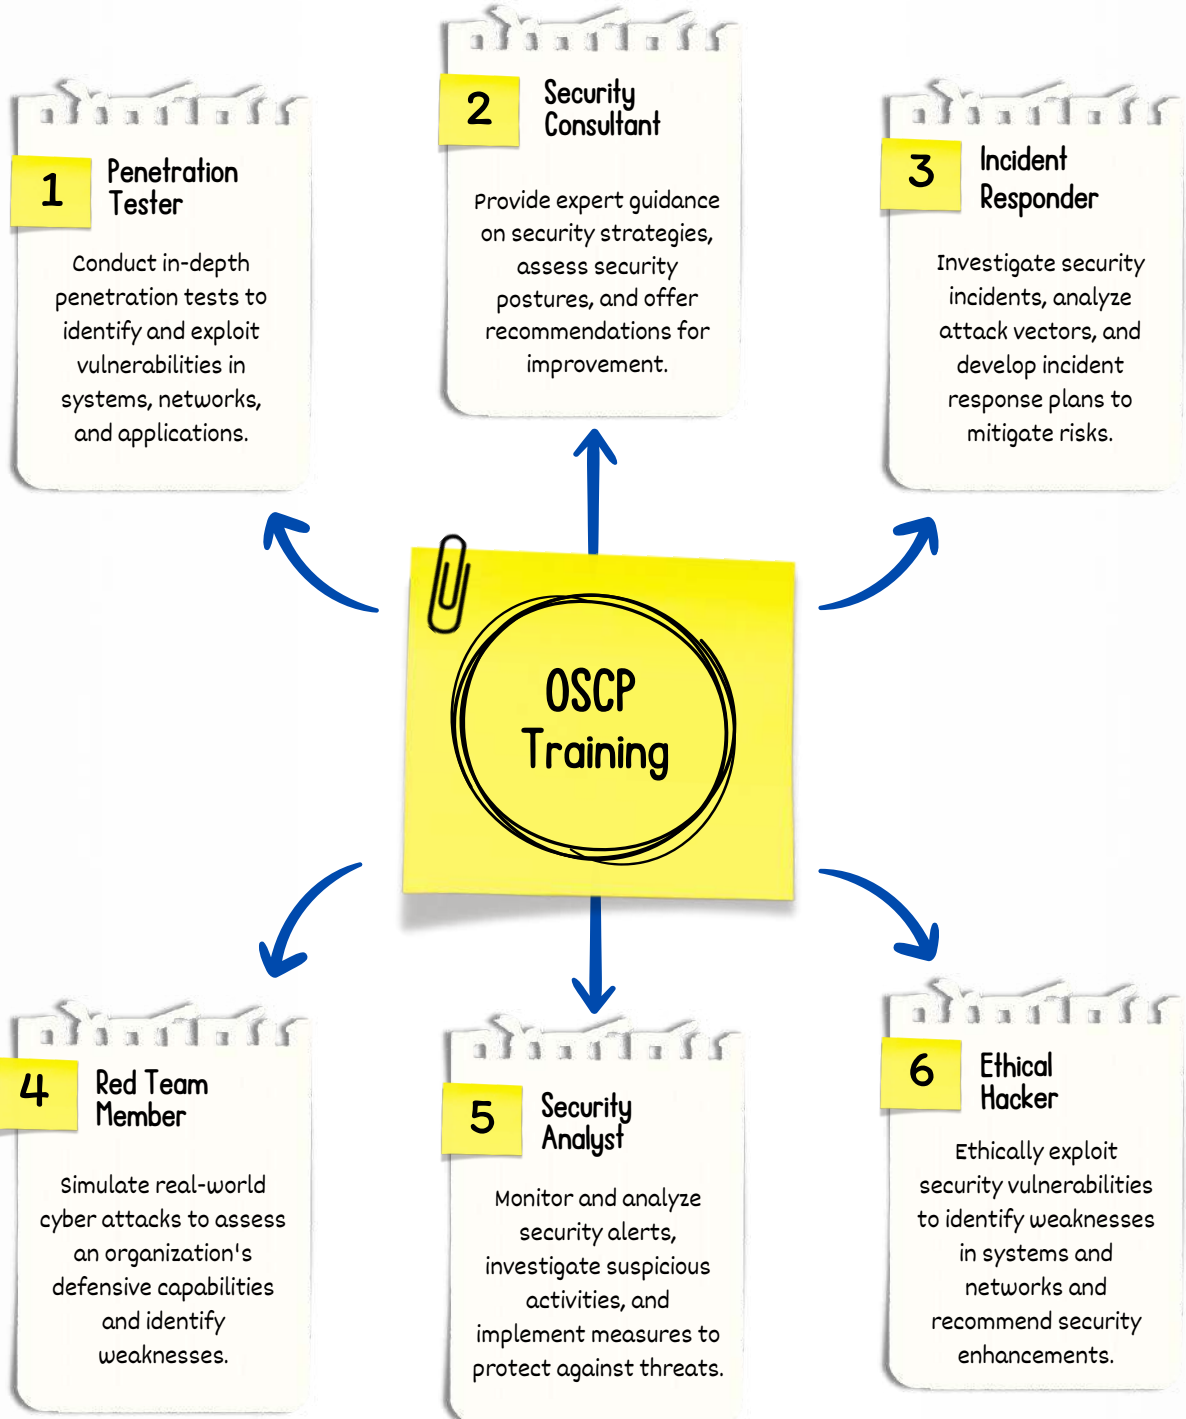

Non-Technical

Students from non-technical disciplines can also pursue OSCP course.

- Arts, commerce, or non-science graduates can join.
- Start with Certified Network Professional (OSCP course module).
- Conclude with Certified Network Penetration Tester course.

Job Opportunities

Trainers Profile

- Our OSCP instructors adopt a hands-on practical approach, ensuring participants gain real-world skills in offensive security.
- Participants engage in real-world penetration testing projects, providing practical experience and a deep understanding of offensive security techniques.
- OSCP trainers bring decades of combined industry experience in offensive security, ensuring participants learn from seasoned professionals.
- Trainers actively practice offensive security, staying updated with the latest trends, tools, and techniques in the field.
- The OSCP training features a tailored curriculum designed to meet the current demands of the cybersecurity industry, providing participants with relevant and up-to-date knowledge.
- Emphasis is placed on skill mastery, with regular assessments, labs, and challenges designed to enhance participants' offensive security capabilities.
- Beyond technical skills, trainers offer career guidance and share practical insights into the industry, assisting participants in building a successful career in offensive security.

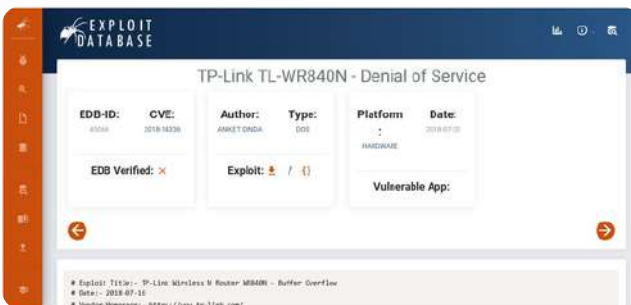

Student Achievements

Rabsun Sarkar one of our students has found zero-day vulnerabilities in Google and in the Security Talent Website and also reported the same:

<https://securitydelta.nl/news/overview/hsd-responsible-disclosure-rabsun-sarkar-reported-a-vulnerability-in-the-security-talent-website>

Aniket Dinda is our student who has found out about Zero-Day Vulnerability and has been published on Exploit DB:

<https://www.exploit-db.com/exploits/45064>

Naini Gupta is our student who has found out about Zero-Day Vulnerability and has been published on Exploit DB:

Our Hiring Partners

Other Collaborators

Parul University: Indian Cyber Security Solutions (ICSS) is delighted to join forces with Parul University in April 2022, marking the start of a five-year strategic collaboration focused on pushing the boundaries of cybersecurity education and research. ICSS will be investing its expertise and resources into this venture, equipping students with unrivaled skills for success in their field - ultimately igniting positive change across the industry through our steadfast commitment. We are brimming with anticipation over what incredible results will come from this partnership!

MAKAUT (ISKFGI College): With the ever-growing demand for skilled cybersecurity professionals. ICSS has teamed up with SKFGI College in a long-term partnership to establish an industry-leading program. For 10 years we will use our wealth of expertise and resources to ensure that students receive cutting-edge knowledge and skills from this collaboration- creating future leaders who can tackle any cybersecurity challenge. Our ambition is clear-develop tomorrow's talent today by empowering young minds into becoming successful digital citizens!

LOVELY
PROFESSIONAL
UNIVERSITY

Lovely Professional University: Indian Cyber Security Solutions has collaborated with LPU to organize cyber security workshops, Hackathons and Bootcamps. The students at LPU put their skills to the test, making for a truly inspiring event. LPU and ICSS have decided to organize more such events as these events help them to sharpen the skills.
